

challenges

how to integrate new suggestions like degrowth, UBI into TU talk?

how to intervene as TU, in the new jobs creation, that there are not too liberal, with green jobs conditions ?

how and where to invest

we need to have our voice heard

ensure the H&S for caregivers

yes, to job creation, but protective/quality jobs

Growth, but with reduction of the consumption of national resources

recommendations

rules to make TUs involved

we need to provide quick answer
need to invest in H&S for workers
reinvesting in museums and
museum tourism

preserve know-how and knowledge
from TUs part

mapping the most vulnerable
people

we need the upskilling of workers

we need to give up some powers to
European federations/confederations
, that can better negotiate

start rethinking the social protection systems
(pension, access to training, resources for work-life-balance)

restore the Social Dialogue in general

design a perfect society with rights and freedom,
and invest and train based on this necessity

we need to include more rights and rules (see min wage&collective bargaining; pay transparency)
